

REMOVABLE AND REUSABLE INSULATION SYSTEMS

DURABLE, HIGH-EFFICIENCY BLANKETS KEEPS YOUR FACILITY SAFELY OPERATING AT OPTIMAL EFFICIENCIES

SUPERIOR DESIGN, QUALITY CRAFTSMANSHIP & EXCEPTIONAL PERFORMANCE

Promatec manufactures high-quality, removable insulation blankets for a variety of industries, applications and environments. Our insulation solutions are resistant to high-temperatures and corrosion, are built to withstand years of dependable service and undergo many removal and reinstallation cycles. We offer sustainable insulation solutions that improve efficiencies and increase your facilities performance.

Our dedicated team produces high-quality, removable insulation covers that not only promote sustainability by enhancing thermal efficiency and reducing CO2 emissions but also extend machinery life by mitigating Corrosion Under Insulation (CUI). These covers contribute to a quieter work environment and enhance safety through thermal protection. With our extensive product line, we offer ready-to-ship insulation blankets for common components, designed to fit snugly and optimally, saving you energy, time, and money.

CUSTOM SOLUTIONS FOR YOUR FACILITY:

- Our expert craftsmen provide custom insulation solutions. From conception to design, we custom-engineer and manufacture blankets to fit even the most unique and complex specification requirements.
- A variety of securement options are available (including velcro, ring & strap, lacing hooks, etc...) allowing you to remove the blankets quickly and easily for routine maintenance and access to valves, pipes and other equipment.
- Blankets can be clearly labeled with metal tag identifiers. In the event that a blanket becomes lost or damaged, we can easily recreate the exact design. (Customize tagging labels can include any variety of custom information: identification number, location, style, valve, fitting numbers, etc...)

INCREASE EFFICIENCY & REDUCE COSTS:

- Nesting and other Lean construction methods reduce waste and minimize costs.
- 3D CAD technology utilized during the design and drawing stages insures accurate fit, efficient design and exact duplication.
- Our blankets are effective in saving energy, regulating your facilities environment, controlling industrial noise and ensuring compliance with OSHA, state and regional regulations.

PCI DELIVERS QUALITY:

- Experienced sewing technicians, rigorous fabrication processes and a stringent 360 degree inspection ensures quality control and attention to detail confirming your blankets are produced to your exact specifications.
- PCI offers routine maintenance to inspect blankets for areas of damage or wear-and-tear.
- State-of-the-art precision CNC cutting machine provides automated cutting technology resulting in accurate cuts and precision every time.

PERFORM^{GREEN}

Our Certified Insulation Energy Appraisers are fully accredited by the National Insulation Association (NIA) to perform energy audits and appraisals at any type of industrial facility.
