

PERFORMANCE ABATEMENT SERVICES

ASBESTOS – MOLD – LEAD PAINT

WORLD-CLASS CONSTRUCTION®

Have Hazardous Materials? Call PAS. There's No Substitute for Experience.

*On Schedule...
On Budget...
Every Time.*

ASBESTOS ABATEMENT

With ever-changing local, state and federal abatement regulations, it's important to know that your liability and exposure is being handled by the best.

With more than 20 years of experience, PAS is the leader in asbestos abatement. Here, all the necessary engineering controls and equipment are used to fully contain hazardous areas prior to remediation. Plus, the safest methods of removal, including glove bag, ceiling scrape and industrial buffing, are used to eliminate asbestos to give you peace of mind.

MOLD REMEDIATION

Rest assured that PAS will safely lower mold spore counts and mycotoxins that can create a toxic breathing environment. PAS performs mold remediation in controlled environments that are similar to lead and asbestos removal. After thorough removal, the area can be tested and in some cases a fungicide or encapsulant is applied to prohibit growth.

LEAD-BASED PAINT REMOVAL

Using OSHA and EPA certified employees, PAS performs chemical and/or mechanical removal of hazardous lead materials on all types of structures and material surfaces under controlled conditions to create a safe environment.

EXPERIENCED PROJECT MANAGERS HELP CHALLENGING PROJECTS

POTENTIAL HAZARD AREAS

Roofing Materials (built-up roofing, flashings, felts, shingles)
Flooring (floor tile, linoleum and mastics)
Thermal System Insulation (piping, ductwork, boilers)
Ceiling Tile or Spray-Applied Acoustical Ceilings
Wall Materials (acoustical walls, siding, sheetrock, joint compound, transite panels)
Lab Hoods and Countertops
Fireproofing
Equipment

PAS provides maximum protection from the long-term liability and tenant disruption associated with hazardous substances.

Trust the **LEADER** in Abatement Services

20 YEARS STRONG

■ **KNOWLEDGEABLE PROJECT MANAGERS ADD VALUE & REDUCE DISRUPTION**

Health risks are inherent in abatement projects. That's why experienced project management is critical. PAS has the knowledge and range of manpower to remediate sites in a manner that is best suited for the client and the services to be provided. You'll find that we are schedule-sensitive and that we use proprietary labor and material control systems that have been developed from years of experience. We can even accommodate tight schedules through shift work and weekend scheduling for your convenience.

■ **YOU'LL FIND PEACE OF MIND WITH PAS**

With more than 20 years of practical experience, PAS has solved every known issue that can come up on asbestos projects. Our trained and certified technicians work with the latest methods, technologies and equipment to ensure safe removal in compliance with government regulations to reduce risk. In addition, you get your work completed on schedule and on budget. All of this adds up to one thing: your peace of mind.

■ **GET LOCAL EXPERTISE WITH NATIONAL RESOURCES**

Throughout the United States, projects are managed in local markets staffed with experienced management and job site personnel who are knowledgeable about all local codes and regulations. Plus, because we are a nationwide company with large resources, we can handle any size project — no matter how fast or large it might grow.

Related TURNKEY Services :

- "By offering the complete turnkey services that typically occur with abatement projects, we save customers the time and hassle of contracting these services out separately."

- Marc Pasley
Area Manager
Kansas City

■ SHRINK-WRAP CONTAINMENT SYSTEMS

An alternative to the traditional poly building containment system, contractors have determined that shrink-wrap is cost effective to contain their entire buildings because it eliminates weather delays and mold potential.

■ COMPLETE DEMOLITION SOLUTIONS

Due to the inherent nature of abatement work, various degrees of demolition work are often required. Drawing on our vast resources and knowledge, we can facilitate a turnkey abatement and demolition solution that is cost efficient and meets all safety regulations.

■ RECONSTRUCTION SERVICES

Reconstruction often accompanies tenant improvement, demolition and abatement projects. Customers can request a complete line of interior and exterior build-back services. From drywall and acoustical ceilings to custom plaster work, all of your needs can be taken care of while ensuring quality and timeliness.

AT THE HEART OF PERFORMANCE ABATEMENT SERVICES

SAFETY

We consistently have one of the lowest EMRs in the country, due in large part to our innovative Safety Program. Every employee receives targeted safety training throughout the year, in the field and in the classroom.

TRAINING

PAS requires comprehensive training for all our foremen, superintendents, managers, estimators, engineers, and administrative personnel. With our advanced job skills programs, we develop the most capable professionals who perform the best service for our customers.

ETHICS

Integrity and reputation are fundamental to our success. That's why we developed the "Principles of Business Conduct." This provides guidance for employees to maintain the highest standards of ethical and legal practices in the industry.

STRENGTH

We continually rank as one of the Top Specialty Contractors in the nation by *Engineering News-Record* magazine. Our strong financial credentials allow us to provide excellent bonding and insurance for our customers' protection.
